About

Product Owner with a background in business analytics and supply chain, currently working at an early-stage FMCG distribution startup in Morocco. Joined when the business had no revenue and took on a broad scope across product, operations, logistics, and commercial — identifying challenges, structuring analyses, and translating findings into concrete recommendations for a small team. Curious by nature, comfortable working across functions, and used to communicating clearly to move decisions forward. Looking to bring that approach into strategy consulting.

Education

Al Akhawayn University in Ifrane

Sept 2020 – May 2025

BS in Business Administration

- **Concentration:** Supply Chain Management & Logistics — AI and Analytics for Business
- **GPA:** 3.43/4.0
- **Coursework:** Management Science, Transportation & Inventory Management, Application of Business Analytics, Special Topics in Business Analytics, Advanced Learning Algorithms (DeepLearning.ai)

Experience

Product and Operations Lead

Berrechid, MA June 2025

Silent Believers Distribution Group (Tobeez)

– Present

- Joined at zero revenue; the business now runs at a stable **~300K MAD/month**, with a peak of 400K MAD reached within the first few months of operations.
- Redesigned the client-facing mobile app from scratch — defined UX flows, back-office processes, and feature scope in collaboration with an external development team, working in Scrum with BRDs and user stories.
- Expanded scope after two months to cover the full operational side of the business: logistics, delivery planning, pricing strategies, trade plans, and promotions.
- Conducted a customer portfolio analysis that identified **~968K MAD** in at-risk revenue; segmented the base by value and recovery likelihood, developed a prioritized reactivation strategy, and presented findings and recommendations to leadership.
- Reduced daily route planning time by **~75%** by building a route optimization tool (Nearest Neighbor + 2-Opt algorithm).
- Currently managing a three-person team (operations coordinator and customer support), handling day-to-day ops, process refinements, problem solving, and field operations.

Data Analyst Intern

Jan 2024 – May 2024

ESG Group Europe

- Analyzed energy and water consumption data using Python to identify inefficiency patterns across client operations.
- Built a forecasting model using Facebook Prophet, achieving **88% accuracy** on a 24-month projection for sustainability KPIs.
- Designed a prototype monitoring dashboard for real-time tracking of sustainability metrics.

Research Intern

Tangier, MA June 2023 –

EQOTA Consulting

Aug 2023

- Reviewed and benchmarked Industry 4.0 maturity models using a structured set of design principles.
- Built an Excel-based assessment tool with radar chart outputs for use in client diagnostics.

Curriculum Developer Intern

Tangier, MA June 2022 –

- Designed a Python programming curriculum for 500+ trainees in collaboration with academic experts.

Research & Analytical Projects

AI-Powered Industry 4.0 Maturity Assessment

2025 – Present

- Building a diagnostic ChatBot for manufacturing transformation using RAG and LangChain to generate structured recommendations from maturity assessment inputs.

Digital Analytics Platform — Co-Founder

Mar 2024 – Aug 2024

- Co-founded a data analytics platform serving hotel clients in the tourism sector; handled business development, financial planning, and product delivery.
- Delivered customer behavior insights to clients; 100% satisfaction rate across engagements.

Selected Business Transformation Initiatives

Delivery HUB Migration & Operating Model Redesign

2025 – Present

- Identified operational governance risks and conflicts of interest within the existing delivery expedition setup and proposed a transition to a centralized HUB model.
- Led cross-functional coordination across Logistics, IT, Finance, Sales, Trade Marketing, and Operations to ensure successful migration with minimal disruption.
- Designed and implemented new operational workflows, ownership structures, communication protocols, and performance controls to support the new operating model.
- Established a scalable foundation for future growth by improving operational visibility, accountability, and coordination across stakeholders.

Market Expansion Launch – Oujda

2025

- Supported the expansion of Tobeez operations into Oujda through coordination with Nadiz Distribution and internal stakeholders.
- Defined operational processes, stakeholder responsibilities, execution plans, and launch readiness requirements for the new market.
- Coordinated execution across commercial, operational, and support functions to ensure a successful market rollout.
- Monitored launch performance and refined operational processes based on early field feedback.

Delivery Operations Transformation & Route Optimization

2025 – Present

- Led the redesign of Tobeez delivery operations by establishing customer confirmation workflows, delivery cut-off procedures, capacity controls, sector-based planning, and operational SOPs.
- Facilitated operational retrospectives with logistics, operations, and customer support teams to identify execution bottlenecks and improve service reliability.
- Developed an internal route optimization tool leveraging Nearest Neighbor and 2-Opt algorithms, reducing route planning effort by approximately **75%**.
- Introduced structured delivery planning processes ensuring daily visibility on confirmed orders, stock availability, and optimized routing before execution.

Business Intelligence & Revenue Diagnostics Platform

2025 – Present

- Built a business intelligence framework comprising **50+ executive visualizations** covering revenue performance, customer intelligence, sales productivity, and operational efficiency.
- Cleaned and analyzed commercial and operational datasets, identifying key business drivers, customer retention challenges, and sales performance gaps.
- Developed executive dashboards tracking revenue trends, customer cohorts, lifetime value, delivery performance, geographic distribution, and sales representative effectiveness.
- Enabled data-driven decision-making by transforming fragmented operational data into actionable strategic insights for leadership.

Competencies

Business & Strategy: Structured Problem Solving, Business Analysis, Revenue Growth, Customer Retention, Operational Excellence, Process Design, Market Expansion, Performance Management, Stakeholder Management

Product & Operations: Product Management, Scrum, Jira, User Story Writing, Backlog Prioritization, Sprint Planning, Sprint Reviews, Operational Process Design, Logistics Management

Analytics & Technology: Python (Pandas, NumPy, Matplotlib), SQL, Power BI, Advanced Excel, Data Visualization, Customer Segmentation, ROI Modeling

Systems & Tools: Jira, SAP Fiori (SD), Microsoft SQL Server, AnyLogic, RapidMiner

Languages: Arabic (Native), English (Full Professional Proficiency), French (Working Professional Proficiency)
